~~1988 Corvette Parts and Accessories~~

The L88 427 c.i.d. engine is one of the most powerful Chevrolet big-block engines ever produced, and it was only available for a short time. The engine is most famously tied to the L88 Corvette from 1967 to 1969, and only 216 L88 Corvettes were manufactured during those years.

~~How to Identify an L88 Chevy Engine | It Still Runs~~

First introduced in 1967, the L88 Corvette featured a highly modified version of Chevy 's 427-cubic-inch V-8 engine. Although this engine received a factory horsepower rating of 435, actual engine output was somewhere between 540 and 580 horsepower, giving the " stock " L88

The Chevrolet Corvette (C4) is a sports car produced by American automobile manufacturer Chevrolet from 1983 to 1996. The convertible returned, as did higher performance engines, exemplified by the 375 hp (280 kW) LT5 found in the ZR-1. In early March 1990, the ZR-1 would set a new record for the highest 24 hour-5,000 mile land-speed by going over a speed of 175 mph (282 km/h).

~~1967 Chevy Corvette L88 - Vette Magazine~~

Zora Arkus-Duntov was in charge of the L-88 Corvette. It was intended for racing purposes, but only a few of the 216 L-88s produced actually raced on road racing courses or drag strips. These cars required super high octane gasoline rated at 103 octane to feed the 12.5:1 compression ratio pistons inside the special high performance 427 engine block.
