Alex Holder takes into account the historic background in which child psychoanalysis developed, especially World War II and the Nazi regime in Germany. The author also looks at the way child psychoanalysis developed in

specific institutions, such as the Hampstead Child Therapy Course in London, and in specific areas, such as the spread of child analysis in the US. The concluding chapter is on the importance of knowledge of child analysis among psychoanalysts

working with adults.

The differences in the theories of the two "greats" in child analysis, Anna Freud and Melanie Klein, are examined one by one, including such concepts as the role of transference, the Oedipus complex and the superego.
