Ishihara's Test for Colour Deficiency: 38 Plates Edition. Dr Shinobu Ishihara introduced in 1917—almost 100 years ago—the most well known color blindness test. Each of his tests consists of a set of colored dotted plates, each of them showing either a number or a path. Since then this is the most widely used color vision deficiency test and still used by most optometrists and ophthalmologists all around the world.

The principle and basis for the Ishihara test chart are the quality of the colours and the colour arrangement. Imitation test and online tests have no scientific basis and are not reliable, resulting in a high rate of false positives and/ or false negatives. We highly recommend you do not use the online version for official purposes. You can buy the original Ishihara test books through this webshop.

Red green colour blindness affects about 95% of all colour blind people. The remaining 5% is composed of blue yellow , and less commonly total colour blindness. Within each colour deficiency is the possibility of being either partially blind to that colour, or totally. For instance green deficient is more common, but being completely unable to see red is second most common. The standard test is known as the Ishihara Colour Test. This test was created by Dr Shinobu at the University of Tokyo ...

Colour Blindness Treatment India Through Brain Mapping System

The Ishihara test is a color perception test for red-green color deficiencies, the first in a class of successful color vision tests called pseudo-isochromatic plates. It was named after its designer, Shinobu Ishihara, a professor at the University of Tokyo, who first published his tests in 1917. The test consists of a number of colored plates, called Ishihara plates, each of which contains a circle of dots appearing randomized in color and size. Within the pattern are dots which form a number o

Ishihara test - Wikipedia

Shinobu Ishihara from Japan produced three different test sets which are widely used and which all based on the same pseudoisochromatic plates. This test is actually designed to be used in a booklet and is usually executed by an eye doctor. But I have made an onlince version of the test, available right here on Colblindor.
