This training circular, TC 7-21.13, "Soldier's Guide," is meant to be a reference for subjects in which all Soldiers must maintain proficiency, regardless of rank, component, or military occupational specialty (MOS). It condenses information from Army Doctrine Publications (ADPs), Army Doctrine Reference Publications (ADRP), Field Manuals (FMs), Training Circulars (TCs), Army Regulations (ARs), and other Army publication sources. It addresses general subjects and is not all-inclusive or intended as a stand-alone document. This guide offers Soldiers a ready reference on many subjects. The Soldier's Guide describes the Army Values, Army Ethic, the fundamental obligations of a Soldier and the basics of leadership.

Since the publication of the first edition in 1999, the science of probiotics and prebiotics has matured greatly and garnered more interest. The first handbook on the market, Handbook of Probiotics and Prebiotics: Second Edition updates the data in its predecessor, and it also includes material topics not previously discussed in the first edition, including methods protocols, cell line and animal models, and coverage of prebiotics. The editors supplement their expertise by bringing in international experts to contribute chapters. This second edition brings together the information needed for the successful development of a pro- or prebiotic product from laboratory to market.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.
