Fluid Dynamics
Hoffman

Explain. Solution:

Since the flow is steady, the fluid acceleration along the half-body surface is convective, $dU/dt = U (dU/ds)$, where s is along the surface.

(a) At the point of maximum velocity in Fig. 8.6, $dU/ds = 0$, hence $dU/dt = 0$, so answer (a) is No. (b)

Computational Fluid
Dynamics Erson
Solution Manual

Computational fluid dynamics (CFD) is the use of applied mathematics, physics and computational software to visualize how a gas or liquid flows — as well as how the gas or liquid affects objects as it flows past.

Read Free Solution Manual

Computational fluid dynamics is based on the Navier-Stokes equations. These equations describe how the velocity, pressure, temperature, and density of a moving fluid are related.
