Teaching and learning literacy in the early years can be a joyful, explorative and meaningful experience. This accessible book will give teachers and practitioners the practical and theoretical skills and knowledge they require to successfully and confidently teach reading, writing and oral skills in the early years classroom. Foregrounding the ways in which literacy instruction can be made enjoyable and meaningful from the very beginning, Teaching Essential Literacy Skills in the Early Years Classroom explores the theory and practice of teaching various aspects of literacy and language, from phonological awareness, phonics and fluency, to vocabulary and comprehension. Chapters draw on the latest research to identify and showcase best practice in writing instruction, illustrate how language and literacy can be developed through play, and outline how a teacher might use the environment to enhance children ' s learning. Downloadable resources, examples of planning, classroom activities and vignettes can be quickly and easily adapted for use in any early years setting. A rich and comprehensive source of information, ideas, activities and tips, this will be a key resource for pre- and in-service teachers and practitioners looking to adopt a cohesive, effective and meaningful approach to literacy teaching and learning.

This study examines the use of prefabricated language (conventional lexical collocations) in the production of native and non-native writers of English. It first develops a framework for the description of restricted collocations and then reviews experimental research into the psycholinguistic processing of prefabricated language. Computer-based corpora of native and advanced non-native academic writing are analysed to discover to what extent and how such collocations are used in formal written English. Pedagogical implications are then considered, and the final part of the study examines the selection and presentation of restricted collocations in general and phraseological dictionaries for learners. The conclusion suggests that advanced learners need specialist collocational dictionaries, and the results of this research help to establish principles for the design of such dictionaries.

This new edition builds upon these foundations and develops further understanding of a key area of applied linguistics, with updated chapters on: * vocabulary and language teaching * dictionaries and lexicography * the literary study of vocabulary. It also includes new material on: * the relationship between vocabulary, grammar and discourse * the implications of new insights into vocabulary for the study of speech and writing.

A practical guide for teaching comprehension and fluency in the kindergarten through eighth-grade classroom with instruction on reading levels, writing about reading, and interactive read-aloud and literature study; and contains a DVD with over 100 blackline masters, forms, and checklists.
