Are New Yorkers and Californians so different because they live in such different settings? Why do some of us prefer the city to the country? How do urban settings increase crime? Why do we feel better after an experience in nature? In this fascinating and enormously entertaining book, Winifred Gallagher explores the complex relationships between people and the places in which they live, love, and work. Drawing on the latest research on behavioral and environmental science, **THE POWER OF PLACE** examines our reactions to light, temperature, the seasons, and other natural phenomena, and explores the interactions between our external and internal worlds.

Gallagher's broad and dynamic definition of place includes mountaintops and the womb, Alaska's hinterlands and Manhattan's subways, and she relates these settings to everything from creativity to PMS, jet lag to tales of UFOs. Full of complex information made totally accessible, THE POWER OF PLACE offers the latest insights into the many ways we can change our lives by changing the places we live.

"Place: it's where we're from; it's where we're going. . . . It asks for our attention and care. If we pay attention, place has much to teach us." With this belief as a foundation, The Power of Place offers a comprehensive and compelling case for making communities the locus of learning for students of all ages and

Backgrounds. Dispelling the notion that place-based education is an approach limited to those who can afford it, the authors describe how schools in diverse contexts—urban and rural, public and private—have adopted place-based programs as a way to better engage students and attain three important goals of education: student agency, equity, and community. This book identifies six defining principles of place-based education. Namely, it 1. Embeds learning everywhere and views the community as a classroom. 2. Is centered on individual learners. 3. Is inquiry based to help students develop an understanding of their place in the world. 4. Incorporates local and global thinking and investigations. 5. Requires design thinking to find solutions to authentic

problems. 6. Is interdisciplinary. For each principle, the authors share stories of students whose lives were transformed by their experiences in place-based programs, elaborate on what the principle means, demonstrate what it looks like in practice by presenting case studies from schools throughout the United States, and offer action steps for implementation. Aimed at educators from preK through high school, *The Power of Place* is a definitive guide to developing programs that will lead to successful outcomes for students, more fulfilling careers for teachers, and lasting benefits for communities.

The Indigenous communities of the Lower Fraser River, British Columbia (a group commonly called the Stó:lō), have historical memories and senses of identity deriving from events, cultural practices, and kinship bonds that had been continuously adapting long before a non-Native visited the area directly. Carlson re-thinks the history of Native-newcomer relations from the unique perspective of a classically trained historian who has spent nearly two decades living, working, and talking with the Stó:lō peoples. Stó:lō actions and reactions during colonialism were rooted in their pre-colonial experiences and customs, which coloured their responses to events such as smallpox outbreaks or the gold rush. Profiling tensions of gender and class within the community, Carlson emphasizes the elasticity of collective identity. A rich and complex history, *The Power of Place, the Problem of Time* looks to both the internal and the external factors which shaped a society during a time of great change and its implications extend far beyond the study region.

This volume explores the nature of power - the power of kings, emperors and popes - through the places that these rulers created or developed, including palaces, cities, landscapes, holy places, inauguration sites and burial places. Ranging across all of Europe from the 1st to the 16th centuries, David Rollason examines how these places conveyed messages of power and what those messages were.

Harm de Blij contends in this book that geography continues to hold us all in an unrelenting grip and that we are all born into natural and cultural environments that shape what we become, individually and collectively.

popular protest in twentieth-century Shanghai and Mumbai highlights recurring debates over migration and citizenship.

Reflecting the revival of interest in a social theory that takes place and space seriously, this book focuses on geographical place in the practice of social science and history. There is significant interest among scholars from a range of disciplines in bringing together the geographical and sociological *imagination*. The geographical imagination is a concrete and descriptive one, concerned with determining the nature of places, and classifying them and the links between them. The sociological imagination aspires to explanation of human activities in terms of abstract social processes.

The chapters in this book focus on both the intellectual histories of the concept of place and on its empirical uses. They show that place is as important for understanding contemporary America as it is for 18th-century Sri Lanka. They also show how the concept can provide insight into ¿old¿ problems such as the nature of social life in Renaissance Florence and Venice. The editors are leading exponents of the view of place as a concept that can ¿mediate¿ the geographical and sociological imaginations.
